To make an acceptance inspection possible the plant must be cleaned directly before start-up and a clear cleaning proof must be provided.

We assign the calendared technical expert, to accomplish the following work :

- Cleaning of the beverage plant with production of a cleaning proof and the accomplishing of an acceptance inspection.
- A current cleaning proof is at the plant, there is only one acceptance inspection necessary.
- A current station log with valid recurring examination is at hand and the plant has a current cleaning proof.
- The plant does not have a current recurring examination and must be examined after § 12 SchankV.
- Accomplish a cleaning of the plant, all examinations are present up-to-date.
